Operational Programming - HARVARD

References: EOGA-71519

1. Recently, this office submitted an operational program for HARVARD for Fiscal 57 and 58 based on the information provided in reference.

2. The question of the contingent sum of \$82,000.00 which may be required for the procurement of operational housing should the currently used facilities be derequisitioned has come up once again. For your information the sum was not included in the HARVARD project as approved for the period 1 October 1955 through 30 June 1956 because of doubts concerning the figure raised by Chief, RTUSEE and due to forecast mentioned in EOGA-70062 wherein it appears that the housing requirements are budgeted by Logistics of the German Station.

3. Although we did include this sum in the operational program for planning purposes it would be greatly appreciated if, before the time comes for the renewal of HARVARD project, namely, 1 July 1956, you could clarify certain aspects of the safehousing picture. Explicitly, we would like to know how much support could be provided to HARVARD by POB, CABEZONE, or possibly ODINEX with regard to safehousing. In addition, we would appreciate your conducting a critical reappraisal of the estimate of \$82,000.00 in light of estimates provided by other German Station projects.
